Although a sidebar is nice to website design, some people may not like how it interferes with design, so an option to close it would be beneficial for them.
who do not like it.

```javascript
function close() {
    let result = document.getElementById("sidebar");
    let clicker = document.getElementById("close-button");
    let opener = document.getElementById("open-button");
    result.style.display = "none";
    clicker.style.display = "none";
    opener.style.display = "block";

}

function open() {
    let result = document.getElementById("sidebar");
    let clicker = document.getElementById("close-button");
    let opener = document.getElementById("open-button");
    result.style.display = "block";
    clicker.style.display = "block";
    opener.style.display = "none";

}
```

My Image Board

To add on to my sidebar, in assignment 2 I intended on using it as a place to host my image gallery, however, due to changing requirements and to improve its utility, I want to reform it as a place to host my the change of color palettes, with 1 being the default, 2 being the pink/purple combination, and 3 being the blue/green.

```html
<div aria-label ="sidebar" id="sidebar" class="sidebar">
    <p id="sidebarp">Color Palettes:</p>
    <br>
    <input aria-label="palette1" type="button" id="palette1" value="1"></input>
    <br>
    <input aria-label="palette2" type="button" id="palette2" value="2"></input>
    <br>
    <input aria-label="palette3" type="button" id="palette3" value="3"></input>
```

*Color Palettes:

1　2　3
